

WOOD WALL BARS 1 TO 6 PERSON SET

2315D - 2325D
2335D - 2345D
2355D - 2365D

1. Attachment principle:

Wall bars are supplied without fastenning.

2. Permissible support frames:

These technical specifications apply only to fixations realized in sturdy concrete supports of a **thickness ≥ 120 mm with a resistance to compression ≥ 23 MPa**, matching with Gymnova concrete attachment set. For other supports, please consult us.

3. Loads applied to the support frame during use:

The forces indicated on the drawing are determined from the values of the norm EN12346.

F = 100 daN
on each fixation

The dimensions only define the load application location

4. Positioning, usage, and maintenance:

Refer to the gymnasium layout drawings, assembly instructions **NM28** and diagrams below.

Warning : this apparatus needs a free area, without elements wich could block its installation or its safety use (i.e. : lights, pipes, heating ...) (see drawing ACC or DET).

5. Design of structures:

Specific requirement for the background (section 6 in standard NF S52-400):

"The background should be appropriate for receiving attachment points and absorbing loads transmitted by sports equipment. Attachment points should not adversely affect the background soundness (watertightness, solidity, etc.).

Only the owner and/or contractor for the background is entitled to allow the attachment points to be fixed and tests to be carried out according to their type and the loads transmitted.

The owner and/or contractor shall entrust the design, sizing and fixing of the following to a professionally qualified body (carpenter, architect, building contractor, design office, etc.):

- attachment point supports;
- foundation blocks;
- possible additional stiffeners for the supporting structure.

The sports equipment manufacturer shall provide the background owner and/or contractor with the following: the loads and stresses of attachment points taken by the background as regards strength values, types and specifications of the proposed attachments.

It is up to the contractor to make the background appropriate for the attachment points in accordance with their locations and the loads provided by the sports equipment manufacturer".

NATURE OF THE SUPPORT:

Material:

Covering: YES NO

Covering type:

Covering thickness (mm):

Owner and/or contractor attachment authorized:

Date:

Name:

Post:

Stamp:

Signature:

The equipment will be installed by our technicians when this document is returned, duly signed, to our offices.
