

ACROFLEX TRACKS

- ❑ High elasticity floor panels with or without a built-in adjustment system
- ❑ Stable tracks thanks to foam blocks and springs
- ❑ Better finish on the floor thanks to flaps
- ❑ Reduction in strain injuries linked to repetition of exercises
- ❑ **Ref. 6260** can be adapted to suit gymnasts of all sizes and levels

⇒ It is possible to combine two types of track – adjustable and non-adjustable.
(For example, an 18 m track – 6 m adjustable and 12 m non-adjustable.)

For special joints between a tumbling track and a pit, please contact us

TECHNICAL SPECIFICATIONS

- ❑ Deliverable by length in multiples of 1.50 m
- ❑ Width = 2 m
- ❑ Overall thickness = 23 cm
- ❑ Two references available:
 - **Ref. 6270** - "Acroflex" track with non-adjustable elasticity
 - **Ref. 6260** - "Acroflex" track with adjustable elasticity

Each panel features quick and easy individual adjustment of elasticity, allowing rebound to be adapted over the entire track length.

COMPOSITION

- ❑ Foam thickness 4 cm
- ❑ Overlay carpet
- ❑ Side skirts
- ❑ High elasticity floor panel (with built-in adjustment system for **Ref. 6260**)
