

SELF-STABILISING FRAME

- ❑ System using weights to maintain the apparatus without fixing to the floor
- ❑ Ideal for all sports halls which don't have floor anchor points
- ❑ Can be fitted to all GYMNOVA apparatus
- ❑ Guarantees the same stability as a conventional system
- ❑ System particularly suitable for quick installation of apparatus such as an exhibition or a gala
- ❑ Enables the configuration of the training hall to be changed without having to carry out any building work

TECHNICAL FEATURES

- ❑ "Stabilizing support" can be transport separately
- ❑ Dimensions at anchor bases: 4 x 5.5 m (complies with international competition)
- ❑ Floor space: 6.96 x 4.20 m
- ❑ Weights not included (8 x 400 Kg required per frame, contact us for information on footprint)
