6172	Spring acrobatic track with overlay carpet

TECHNICAL FEATURES

Thickness = 20 cm

Composition:

Concertina-folding comfort foam

- 40 mm-thick foam is made up of concertina-folding mats for quick and easy installation.

Dynamic floor

- The floor is made with a special plywood laid on dynamic springs.
- The panels are connected together using new fastening sections and new locking plates for optimum consistency.
- The springs are more flexible and are strategically positioned on the floor so the gymnast can get a more consistent rebound

References available:

Ref. 6171 - Spring acrobatic track with roll-up tracks:

Comfort is ensured by the 25 mm-thick roll-up tracks with a Jaspe (flame-pattern) carpet on high performance dynamic foam.

Ref. 6172 - Spring acrobatic track with overlay carpet:

For a completely flat and consistent working surface. The perimeter of the carpet is finished with whip stitching.
