

LARGE TRAPEZIUM MODULE

- ❑ Allows the discovery, the initiation and learning of gymnastics.
- ❑ By adding or removing elements you will be able to build many different obstacles
- ❑ Suitable for schools and for Baby-Gym
- ❑ Ideal for vault's introduction
- ❑ Allows gymnasts to build confidence or to overcome fear.
- ❑ Allows an easier access to apparatus and spotting.

TECHNICAL CHARACTERISTICS

- Each of the sections is made from dual density foam, with a harder area on top for stability:
 - Top: polyethylene - thickness 4 cm - density 25 kg/m³
 - Down: polyurethane - thickness 26 cm - density 28 kg/m³
- Phthalate-free 1,000 denier PVC cover with M2 fire rating
- Anti-slip base
- With carrying handles
- Hoop-and-look strips
- Comprises 4 sections which can be detached and used separately.
- Possible heights: 30, 60, 90 and 120 cm
