

LADDERS

- ❑ Material entirely dedicated to young children's motor skills
- ❑ Easy adjustment thanks to the assembly pieces
- ❑ They are modular and enable infinite combinations to be created

TECHNICAL FEATURES

- ❑ Comply with the safety requirements of French standard NF S 54-300 (overturning and stability)
- ❑ Made in stained and varnished wood
- ❑ Ladders are available in 4 models: large and small, straight or curved

=> Please note that in accordance with French standard NF S 54-300, a landing zone should be provided at the base of all structures and modules over 60 cm in height.
