- **South American Championships:** 2013, 2015, 2016, 2017, 2018
- **FIG World Cups :** 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019

FEATURES

High elasticity surface

The design of the wooden panels provides a high-performance and dynamic exercise surface while maintaining consistency of the gymnastics area

Panel assembly system

The tension system using cables ensures the entire assembly is held together correctly.

Excellent impact absorption

Dedicated foam mounts located under the wooden panels provide excellent impact absorption thereby enabling injuries to joints to be reduced

Visible exercise area

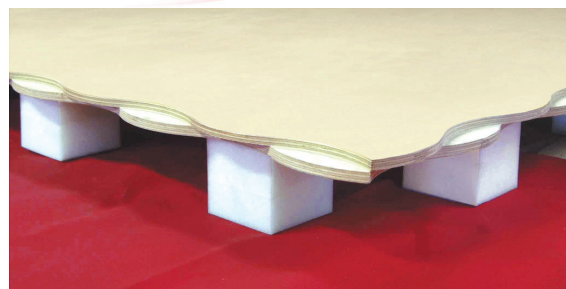

The markings for the 7 x 7 and 10 x 10 m (by 5 cm wide self-adhesive tape) peripheral exercise zones enable the gymnastics area to be visualized exactly

Quick and easy to set-up

Easy to disassemble and storage

Technical Features

Dimensions: 12 x 12 m (LxI)
Thickness: 7 cm
Weight: 1930 kg

Made up of 64 identical nesting panels fitted and 36 edges, impact-absorbing foam blocks, 4 tensioning straps and 4 tensioning cables

Peripheral consisting of PVC finishing flaps

7 m and 10 m exercise zones marked out with self-adhesive strips (wide = 5 cm)

Matt surface in conformity with FIG standards

Packing

Delivered with 5 parcels

Quantity	Features	Ref.	Dimensions (L x w x th)	Weight (kg)
2	32 mattified Panels + 18 mattified Edges	6632/20	152 x 151 x 172 cm	950
1	Accessories (corner pieces + fasteners + tighteners + cables + adhesive)	6630/111	50 x 34 x 26 cm	20
1	Set of 4 finishing flaps	6630/112	60 x 40 x 22 cm	5
1	set of 4 pairs of ratchet straps	6632/40	40 x 30 x 23 cm	5
